I am writing to you today, in support of bill HB2269-A. I live next to a large factory, that spews out grayish brownish smoke all the time. We know it has small particles in it, and the DEQ hasn't done anything to stop it. I like to ride my bike near there, and have been worried about breathing the pollution in my neighborhood. I shouldn't have to breathe this where I live. We need more protections for our air. I urge you to do what is necessary to protect our air, and make sure it is clean.

Thank you,

Amy Becker
