Senator Floyd Prozanski, Chairman,

Oregon: Anti-Gun Bills Aimed at Law-Abiding Citizens to be Heard on Friday, April 5th,

Oregon state Senate Judiciary Committee. These bills attempt to create a "solution" to a non-existent problem and instead create a new class of criminals amongst otherwise law-abiding citizens. Please do not place any additional requirements on a group of people who have already gone out of their way to abide by the law to exercise a constitutional right. Concealed Handgun licensed (CHL) holders are not a threat to any Oregonian. Crime rates are reduced in states with CHL holders. Existing law is enough, prosecute those who break the law not those who have already taken overt steps not to break the law.

Secondly, though I am for commercial sales and gun shows requiring background checks, I am opposed to any additional changes to regulations of private sales. If you where to look at existing state and federal law there is already necessary statutes to address and regulate potentially adverse behavior. Again, do not waist taxpayer time trying to find people who may break the law in a group who classically is not, make those who break the law do the time for the laws they break. Enforce, don't punish.

I am a gun owner and I vote!

Respectfully,

Joel R. Glass
