I live near Going Street, which goes to Swan Island, I-5 and I-405 and all of these are travelled heavily by trucks with diry deisel engines. The deisel pollution has gone from worse to terrible since all the old trucks that California and Washington have banned have simply been moved to Oregon.

Please support HB 2269 and restore SB 1008 to it's original wording before it was gutted.

Sincerely,
Bruce Hellemn
