To whom this may concern,

History has shown that restrictions on firearms has no realistic or reasonable impact on firearm violence.
When we look at the horrific cases that have happened with gun violence you will see that not one person In these cases had a firearm to protect them or other victims. With some of the restrictions that could be put into Affect it does nothing but restrict victims from protecting themselves from the mentally unstable or criminals. Instead of focusing on restrictions, why don't we all focus on mental illness care. With all of the money and time spent on these unconstitutional restrictions on firearms My Tax dollars are going towards, I would rather see focus on the protecting our children at schools, expansion of mental health care and the justice system/explanation on the police forces to stop these sick individuals.
Please consider the constitutional rights of the responsible and law abiding firearms owners who have done nothing to deserve any restrictions.

I will leave you with this quote,

"The rifle itself has no moral stature, since it has no will of its own. Naturally, it may be used by evil men for evil purposes, but there are more good men than evil, and while the latter cannot be persuaded to the path of righteousness by propaganda, they can certainly be corrected by good men with rifles."
— Jeff Cooper, *Art of the Rifle*

Thank you.
