This type of proposed gun control legislation only serves to make honest law abiding citizens criminals and is an attack on our 2nd amendment rights. The people that would commit the crimes, that you're attempting to prevent, are mentally unstable and are cowards. The people that carry licensed concealed weapons are not cowards. They carry a weapon because they know how to use it and they are willing to lay their life down to protect their children and family. You want to prevent them from doing that at a time when counties are having difficulty funding their police and sheriff departments and programs. The mental health of this country has been on the back burner for decades and this couldn't be more evident than by looking at the growth of our homeless population. Many of these people need mental help and some should be institutionalized but this society chooses to ignore them and the mental health issue. I feel that this legislation is a knee jurk response to recent tragedies and that it will do nothing to prevent future tragedies, instead it will serve to increase our vulnerability. These recent tragedies are crimes against society. Society needs to wake up and smell the coffee and take responsibility. Making arbitrary gun laws is not the answer and serves only to polarize and divide the country.

Sincerely, Dan Hollars
