Dear Barbara and Michael,

It's sad that we are the dumping ground for California and Washington State trucks because of DEQ's inability to enforce clean air standards. Give them the power to at least enforce standards on stationary polluters. Don't make the people of Oregon pay for industries' socialization of waste with poor health.

There is an article in the May 6-12th 2017 issue of The Economist on page 74 reporting on the mechanism linking air pollution and heart disease. It's clear for lung disease but until now though heart disease seemed to correlated it wasn't understood how.

We are all caught between I-84 and Columbia Blvd and I-5 and I-205--though your constituents along I-84 probably have it worse. Lord only knows where all the sources of industrial air pollution are.
