Dear Committee Administrator,

I am an Oregonian living in Eugene who is in favor of HB 2269. During this unfortunate time when the EPA itself is being gutted, I cannot trust the federal government with the important job of monitoring and safeguarding our air quality.I don't think that environmental health risks will be identified and curtailed without funding. I want my tax dollars to go to keeping Oregon clean and green, but for goodness sake! Industry must pay its share!
