Governor Brown and Low Frederick, Tawna Sanchez, and Earl Blumenauer,

I am in support of the CLEANER AIR OREGON bill (HB 2269). This is essential to the health of Oregonians- economic prosperity comes from healthy communities. The work from cleaner air Oregon is critical and needs funding, we need an air toxics regulatory program!. It is not a mystery that Portland is one of the most polluted cities in the country! I live in the most polluted portion of the city with my two children that have both tested with high levels of toxins that are high in the neighborhood due to our proximity to a glass factory and the freeway! If this is not funded, we can take legal action ourselves.

Thank you

Laurie
