Date: Wednesday, April 17, 2019 3:20:15 PM

Dear Legislators,

Please invest in our future by investing in Oregon's public education system. Our children are counting on you to provide them with real opportunities to become productive and positive community members. Our families are relying on your leadership to provide the resources that build high quality public schools.

The cuts to public education in our state have eroded community faith in our schools to do the best possible job educating our children. Please be the leaders our state needs to change this pattern. Oregon children deserve not just bare minimum education but the best possible education regardless of the wealth or poverty of their family and neighborhoods.

Thank you for taking care of our kids by directing adequate resources to our schools, the heart of our communities.

Emily Lagozzino
