**Subject:** Monday's hearing 4/25/11 on HB 3632

Hello, Rep. Berger and Rep. Barnhart!

On HB 3632 regarding natural gas promotion which is up for hearing on Monday, April 25, 2011, you both have encouraged my client, the Pacific Propane Gas Association, to have witnesses at the hearing. Rep. Barnhart, you especially asked for a witness who could speak to all alternative fuels, and we think we have found a very knowledgeable person who routinely consults with fleet owners and helps them work through a variety of issues to select among various alternative fuels. He is coming from California.

We will have several witnesses from the Bend-La Pine area, from Central Point, as well as from Portland. These witnesses include several propane dealers who sell to fleets, a school bus fleet manager, and possibly a bus conversion company. Since there will be so many people from far away coming to testify who are not able to come back another day, is it possible to put this hearing first on the agenda, since your agenda is rather lengthy? I have asked my folks to limit their time and will be working with them tomorrow to coordinate their testimony.

Thank you for your consideration, it is appreciated. I wanted to keep you informed about the witness list. As I understand it, there will be some amendments to another bill, HB 3622, that are tied to HB 3632, and I am hoping that the testimony Monday on HB 3632 will be sufficient to answer potential questions that may arise in the conversation about 3622 amendments, since it will be similar. I doubt that most of my witnesses can come back for that hearing.

My best wishes to you both (and Paul!) for a very happy and restful Easter.

Thanks, Lana
