**WHAT THE MEASURE DOES:** Specifies requirements of financial management systems for public charter schools. Requires district extended weighted average daily membership (ADMw) to be calculated separately for students in public charter schools and students in district schools. Removes requirement that school districts transfer a portion of ADMw to school districts of students who are not residents.

**ISSUES DISCUSSED:**

- Compatibility of district and charter school financial systems
- Sharing hold-back with resident districts
- Current lack of enforcement
- Potential shortfall created by district enrollment decline and charter school enrollment increase
- Concerns regarding concept of funds following students

**EFFECT OF COMMITTEE AMENDMENT:** No amendment.

**BACKGROUND:** The Oregon City School District requested this legislation to address specific issues arising from the incompatibility between its financial management systems and those of its sponsored charter schools. Additionally, the district expressed concern about the potential financial impact of reduced state school fund distributions in the face of declining district enrollment and increasing charter school enrollment.

House Bill 3417 requires charter school financial management systems to be compatible with those of the sponsoring district and to comply with the uniform budget and accounting system adopted by the Board of Education to facilitate audit and reporting requirements. Additionally, the measure requires the separate calculation of ADMw for charter schools to address the potential shortfall that would occur should district average daily membership (ADM) decline while charter ADM increases. Finally, the measure clarifies that districts are not required to transfer funds to the districts of its non-resident charter school students, except for students receiving special education services.
