

This letter is a comment on possible speed limit changes in Oregon for Commercial Trucks. I drive between Portland and Medford nearly every Friday and Sunday. The most frustrating and hazardous part of my trip is when a line of traffic gets bunched up behind one commercial truck trying to pass another one at 10 mph less than the normal flow of traffic. Oregon is one of the last states to recognize this is not a safe practice and needs to be changed to let traffic flow at the same rate of speed.

Thank you
