The Barry point fire was both sad Dally. Even and devastating for our family. One third Fire story of the fire was grazing land for 9-19-12 our cattle. We lost it all. We lost over 40 head of cattle. It was a big set back for the ranch. It has really been hard for the mill. They have lots of business now but in a couple of years they are going to have nothing to log. The fire got most of its fuel from the forest not being managed for the last 30 yrs. We now have no place to take our cattle. We got an evacuation level one at my grandma's house. It was only one mile away and it was very scary. I went to the fire one day with my family it was very sad to see all the beautiful land burnt. There were not all 40 dead cattle like 20 dead and the rest we had to put down. Because of there shells on there feet were falling off. It was really sad for my dad and Uncle. All the timber on our private ground was burnt. They were going to use that as a retirement fund. So that they didn't have to take money from the ranch for the new generation, my sister Cheyenne, my Cousin Nicole, my brother cash and I. The Barry point fire was very hard on our family and family ranch.
