Subject: VEHEMENTLY OPPOSED TO SB633!

Hello,

I am writing to express my dismay that this bill is even being considered, in our state. This is a crime against nature and everyone who grows food, or eats food. This must be stopped. It is of utmost importance that our counties are able to control the seed policies affecting its citizens. Please say a resounding NO to the bio-tech industry backing this bill, and protect the precious right of counties to control our seeds!

Most sincerely yours, a home vegetable gardener of 45 years, and property owner,

Conny Lindley
Williams, Oregon
