Columbia River Gorge National Scenic Area

A profoundly beautiful and special place

Ν

A journey's end or traveler's ambition for many generations

The Columbia River Gorge is one of the world's Top 10 Sustainable Destinations — National Geographic Traveler (2009) noted that the Gorge "<u>is in excellent</u> <u>shape</u>. relatively unspoiled, and likely to remain so.....the two states have done an <u>incredible job of managing and pro-</u> <u>tecting the resources and views</u>....some of the <u>best land-</u> <u>preservation</u> programs in the nation."

Help us keep up the great work!

"We're not just preserving our land and water for the next generation ... we're bolstering an outdoor economy..." President Barack Obama, addressing US Department of the Interior — March, 2012

Cultural Resources

More than 10,000 years ...

The Columbia River's sea-level cleaving of the Cascade Range provided a connective link between the "Intermontane West" and the "Northwest Coast" Native American cultural groups more than 10,000 years ago. The Yakama, Umatilla, Warm Springs, and Nez Perce treaty **tribes still fish the river today much like they have for hundreds of generations**. The rock art and many artifacts buried beneath soil and sand don't fully encompass the cultural significance of the area which in itself is a sacred place to the tribes.

The Columbia River Gorge remains both an important historic and contemporary cultural resource to protect

Valley and beyond. through the Gorge in the 1830s. Those early settlers included at first missionaries and then others attracted to homesteads in the Willamette the names of iconic geologic features such as Beacon Rock. European settlers eventually followed the explorers on their dangerous trek Lewis and Clark's Corps of Discovery traveled through the Gorge in 1805 and 1806. Their impressions are recorded in history books and in

CLARK NATIONAL HISTORIC TRAIL

The link between tourism dollars and the recreation assets of the Scenic Area is hard to ignore. The outstanding quality of life in the Scenic Area attracts high-tech businesses and entrepreneurs . People move to the gorge to windsurf at lunch or climb Dog Mountain after dinner. The businesses they start create jobs, stimulate the economy, and attract a highly skilled workforce .
The resources protected by the Scenic Area Act are interdependent — and recreation is no exception. The Gorge's scenic, natural, and cultural resources enhance a world-class recreation experience. Recreation is carefully managed to protect the resources it depends on to provide the highest quality of experience.
The Gorge is a year-round mecca for recreation. Favorable winds lure kite-boarders and windsurfers from around the world. Other recreation enthusiasts enjoy the water while kayaking, white water rafting, paddle boarding, boating and fishing. Visitors seeking fun on land enjoy rock climbing, camping, hiking, biking, golf, wildlife watching, vineyard tours, and much more. The recreation possibilities are endless!

he Commission relie	The Commission relies on equal investment from Washington and Oregon to fulfill the two states' innovative agreement to:
 Administer the 	Administer the National Scenic Area Act for state, local and private lands in the Gorge;
 Review and up 	Review and update a National Scenic Area Management Plan at least once every ten years;
 Review new d 	Review new development proposals for any county that has not adopted the Management Plan;
 Monitor count 	Monitor county activities for consistency with the Act;
 Hear appeals f 	Hear appeals for actions or court orders relating to implementation of the Act; and
on of busined .	Resound to certain civil actions brought to compel compliance with the Act

Recent Accomplishments and Continuing Work
2012—2013 National Scenic Area Collaborative Engagement Assessment - The Commission is working with Oregon Consensus and the William D. Ruckelshaus Center to assess regional priorities and willingness to work collaboratively toward the successful future of the National Scenic Area.
2010—2013 Sustainable Recreation Strategy This multi-agency and stakeholder partnership is working to create a common vision for recreation in the Columbia River Gorge, work collaboratively toward a sustainable recreation economy, and increase citizen stew-ardship through education and outreach.
2008—2012 Government to Government Tribal Consultation The Gorge Commission is committed to building strong positive rela- tionships with the four Columbia River Treaty Tribes—Yakama Nation, Confederated Tribes of the Warm Springs, Confederated Tribes of the Umatilla Indian Reservation and the Nez Perce—and the Columbia River InterTribal Fish Commission. Since 2008, the Commission has Con- sulted with the tribal councils and key staff from the four tribes in an annual government to government summit.
2007 and continuing Vital Signs Indicators Project (VSI) – The VSI is a long-range monitoring effort that provides a comprehensive re- gional assessment of the condition of scenic, natural, economic, cultural and recreation resources in the Gorge. An unprecedented level of community and agency commitment to scientifically sound monitoring provides objective data to inform management policies. The VSI received a 2009 National Center for Civic Innovation "Trailblazer" Award in recognition of the Commission's public performance measurement and reporting efforts.
2007—2008 Columbia Gorge Future Forum - This regional public engagement project to develop a vision for the future of the Columbia Gorge was selected for a 2009 Professional Achievement in Planning Award by the Oregon Chapter of the American Planning Association.
