

1) If you are CDC positive, and denied treatment because you were told your test is not real because its IgeneX please indicate which doctor told you this , which specialty and which office told you so (example, Dr. Gilbert, OHSU infectious disease) Attach to your letter go to the files here and download the three IgeneX reports **WOW. TALK ABOUT TIMELY. Dr. Bryant, OHSU infectious disease [one month ago]. Dr. Eric Chang Legacy infectious disease [yesterday].The Igenx test says Lyme++ plus 2 co-infections.**

2) If you were treated for 28 days or less and told you were no longer infected, based in IDSA Protocols, please state that,...Also state if you had still had or relapsed symptoms If you continued to get out . of state MD or instate ND care and got well, please also write a letter. **I am having to use a ND and the care is not covered by insurance. I got the positive test results in October 2014. Since then, I've been treated according to the protocols of the ILAD and I am improving. I've had the disease, undiagnosed, since 1992.**
