

I doubt this message will even be seen....by anyone. I have HAD it.....ODFW is a worthless waste of tax payer money, that produces nothing . If they were a “private sector” company, They would fail. It is all politics and no reality. Sadly, the state of the world has morphed to where it is a fact, that if you are a politician you are on nobody’s team but your own, and you shurly produce nothing of value or importance to anyone. Sadly, the same rings true for any state or federal employees. There was a day in my lifetime that some state and federal employees were the “best and the brightest” in their fields. This is no longer the case. If you are an elected official, or an employee of the government you are no more than a “pure taker” that produces nothing but buacracy and failed policy across the board. The game commission people are appointed by the governor ,and I have known a few personally, and they were less qualified for that position than most “average” people with little or no understanding of fish or game or land management.....in other words “political puppets”.

ODFW is proposing fee increases to fund nothing but more of their political agenda. It is time for the people to rise up and disregard any new fees or laws by not buying a lic to hunt or fish and break that worthless bunch of schills.

There are two kinds of mindset.....Patriots and “loyalist to the crown”.....I am a patriot. If whoever reads this is a gov employee, they will probably have to google “loyalist to the crown” to see that they are one. ODFW are “red coats”...the people that fund them thru lic sales are “patriots”. History shows what happens to “red coats”.
