

Senate Judiciary Committee:  
Oppose SB 945.

It is troubling that, while seeking to punish gun owners when minors access their firearms, there is no effort made to force people to safeguard prescription drugs, tools, knives or their cars, all of which are responsible for far more deaths than firearms acquired by minors.

If you are really interested in saving lives, why not address the countless deaths caused every year by doctors' mistakes?

Why promote SB 945, which would make it illegal to safeguard a firearm for a friend who was suffering from a bout of depression?

Such policies are driven by asinine agendas rather than any desire to reduce deaths. I urge you to delete these dangerous positions.

Oppose SB 945.

Respectfully,

Eric Cole
