Subject: support HB 3470

Dear Chair Vega and Representatives of the House Energy and Environment Committee,

I urge you to pass HB 3470 out of Committee so that the full house can vote on this critical and forward-looking piece of legislation. As a grandfather, I can only say we are long overdue in working to reduce greenhouse gas emissions. This sensible proposal is a pretty minimal first step in meeting our obligations towards ourselves and future generations. I appreciate your consideration of this matter.

Sincerely,
Robert Currie
