Regional Healthy Communities Initiative:

Building CCO-Public Health Collaborations and Infrastructure to promote community health

Ways and Means Committee on Human Services April 30, 2015

Kim Whitley, MPH

Vice President and Chief of Operating Officer

InterCommunity Health Network Coordinated Care Organization

Regional Healthy Communities Initiative Collective Impact Model

LINCOLN

SENION .

LINN

Common Agenda	All participants have a shared vision for change including a common understanding of the problem and a joint approach to solving it through agreed upon actions
Shared Measurement	Collecting data and measuring results consistently across all participants ensures efforts remain aligned and participants hold each other accountable
Mutually Reinforcing Activities	Participant activities must be differentiated while still being coordinated through a mutually reinforcing plan of action
Continuous Communication	Consistent and open communication is needed across the many players to build trust, assure mutual objectives, and appreciate common motivation
Backbone Support	Creating and managing collective impact requires a separate organization(s) with staff and a specific set of skills to serve as the backbone for the entire initiative and coordinate participating organizations and agencies

Regional Healthy Communities Steering Committee

Low socio-economic status, racial and ethnic minorities, mental health consumers, aging adults, persons with disabilities, homeless persons, LGBTQ, youth

Identifying Key Health Issues

- County and IHN-CCO Community Health Assessments
- Prioritized areas in Community Health Improvement Plans and other key stakeholder plans
- Inventory of regional tobacco prevention past and current efforts
