

Dear members of the Senate Environment and Natural Resources Committee,

I urge you to support HB3470 this session. If implemented, this policy would not only reduce all of Oregon's greenhouse gases because it addresses the full life cycle of fossil fuels, it would incentivize the renewable energy sector which can only be a positive for Oregon's economy for many years ahead. Policies that cap emissions have been successful in other places in doing these two things and it's time that Oregon join the leadership in what is the moral responsibility of citizens to take care of all life now and in the future.

Respectfully,
Sherrill Rinehart
Ashland Oregon
