Senator Alan Olsen
Senator Michael Dembrow
Senator Floyd Prozanski
Senator Chuck Thomsen

Re: Your Urgent Attention Today - HB 3470A

Dear Members of Senate Committee On Environment and Natural Resources;

Thank you all for your valued work on environmental progress for Oregon. I am very pleased to recognize that this senate body has the foresight and awareness that the residents of planet Earth face extreme climate impacts from environmental pollution.

I understand that today you'll hold key hearings on two Greenhouse Gas Emissions bills, SB 965 and HB 3470A.

I urge speedy acceptance of HB 3470A, and its return to the floor. It is an essential step toward a workable process for the State of Oregon that will add to the growing list of state governments that recognize our shared need to act.

There will no doubt be much work ahead on refinement and implementation of this measure, but I am reassured knowing your people recognize that early progress is vital.

Please do all you can individually and as a body to advance HB 3470A in this session.

Respectfully,

Lee Baldwin
