**To:** Reiley Beth  
**Subject:** Emission Pricing (HB 3470 and SB 965)

Hi Beth,

My name is Sam Becker and I recently graduated from St. Mary's High School in Medford, OR. I am writing to support HB 3470 (cap and allocation) and SB 965 (cap and dividend).

I want real climate policy NOW because climate change is real, it is imminent, it is caused by humans, and every day we do not take action to curb our emissions the world is getting warmer, natural disasters are happening more frequently, and ecosystems are slowly devolving into a state of no return.

We cannot not wait any longer to take action to stop climate change...and if we do wait, we are putting the livelihood of every person in a future generation at greater risk of poverty and/or death. I just graduated from St. Mary's High School with a class full of people who have bright futures, but if we keep up our unsustainable ways of life, there is no way that our children, and our children's children, will have the same bright futures ahead of them. Therefore, it is necessary to quickly lay the foundation to get support for legislation like HB 3470 and SB 965.

Sincerely,

Sam Becker
