

Rules Committee

I am a supporter of the National Popular Vote bill, HR 2927, as I believe this nonpartisan move toward direct democracy is badly needed. Please pass this bill quickly so that it can move to the whole house and onto the senate.

We've long needed a fix for the outdated Electoral College and this one seems perfect. Most other democracies in the world have direct popular votes for their leaders.

I believe much of the division in the country in the months since the presidential election is due to the presidency going to the popular vote loser.

Please pass this important bill and see it on its way to passage.

Thank you.
