an info copy

Dear Representative Johnson,

I agree with the reservations that PSR puts forth concerning nuclear power in general and this proposal in particular. We should oppose power plants which in the long run cause more problems than they solve.

Before moving back to Brightwood I lived for years in Pacific City—but after that community defeated the proposed nuclear power plant there. My neighbor there, by the way, has made a complete career working for the clean-up at Hanford.

Thank you for your considered work on this and other issues.
