Rules Committee,

Hello,

I am writing today to urge your support of HB2927.

It is important to me and I think to most of my fellow Oregonians that the President of the United States be elected by a national popular vote. This would mean that our votes would actually matter, and our voices heard in this very important matter. It is clear with the last election more than any other that the electoral college is easily manipulated and elections decided against what the will of the people actually voting want.

Again, please support the vast majority of Oregonians and pass HB2927 this year, quickly and with no amendments.

With gratitude,

Jacquie Begemann
