I am writing in complete opposition to SB-46. Here in Deschutes County we have been petitioning our Commissioners to develop and adopt a grading ordinance. This has been a difficult task as the voices of Oregon residents doesn't ring as loudly as those of Developers and their lawyers. It had always been our hope that we would at least the State to intervene should development turn into surface mining levels. Indeed the state has had to do this several times in Deschutes County in just the last few years. This bill would remove all rights and protection for residents of Oregon especially for those counties without grading ordinances. Please represent the voters of Oregon and not the special interest groups!
