

Hello,

I would like to say that we received a grant for Broadband last year. We did not have a choice in our little City and the internet service that was available was unreliable. We have people that work from home and some that do educational podcasts, and other podcasts and they were not able to do it with the connection that was available. Since Douglas FastNet arrived, people finally can have decent internet, podcasts are starting up, work from home is uninterrupted, those that have Netflix no longer notice a buffering when watching TV. It has been great for our City and we would not have this if it weren't for the grant. Broadband accessibility is so important in rural areas!
