

We are retired senior citizens & we are against the cap & trade program. With all the school bonds, library bond & park bond that we will soon be voting on it is getting too expensive to live in Deschutes County. We live out of Redmond so have to drive into Redmond to the grocery store, we will not be able to afford gas if they raise it another 16 cents per gallon.

All government seems to do is spend money, they do not make our schools accountable for the tax dollars they receive & then the graduation rate is not that great. Pers is going to bankrupt the state, but no one does anything about that.

Now the state is going after our President because he wants to build a wall to keep the citizens of the United States safe. So where does that money come from? Our tax dollars hard at work, helping illegals & not helping the Veterans or homeless. Now all of these diseases are coming into the United States from all of these illegals, they are the one's that get free health care & free education!!!

Fed up taxpayer,

Margaret Stoltenberg
