Before the House Committee on Revenue

Support for HB 2429

As a fifth generation hop grower, I support HB 2429 as amended to include exemption for machinery and equipment used to compress plants.

I am a compliant tax payer and pay significant tax on land and buildings already.

Hop harvest includes PICKING, DRYING AND BALING in order to market them.

Hops are not marketable unless these processes occur.

Please support HB 2429.

Thank you for allowing me to comment.
