My name is Katherine and I have seen the wrong that Lane county is doing. Open the compound in blue River Oregon and put it to good use. Stop building apartments for college students and start building apartments for low income people of all groups. As being homeless is not what these people want but rent prices are far from reasonable they are outrageous. A studio goes for more that most get on disability or SSI. Do the math building apartments for low income people and letting even me run the compound for the homeless people and make things right and better. All most of us want is a hand up not a hand out. But 99% of you don't care you want money the other 1% was just want a safe place to park!
