To whom it may concern,

I am concerned about the impacts of HB 2020 on my local community. This bill has significant negative impacts on local businesses and families.

If Oregon passes a cap-and-trade law, it will increase the cost of living and working in Oregon. All residents will bear the cost of fuel increases and increased natural gas rates. The price of fuel would increase by at least 16 cents per gallon and would drive Oregon to have the third-highest gas prices in the country. Natural gas prices would also increase by double digits in the first year. This not only hurts local families but businesses as well. Companies in Oregon would end up paying higher energy and operating costs, which would result in fewer living-wage jobs. This is especially concerning in rural areas.

As drafted, HB 2020 penalizes companies that make or grow things in Oregon. It also raises hundreds of millions of dollars in new revenue without any accountability for how the money is spent.

Oregon is already a leader in renewable energy and low carbon-emissions. House Bill 2020 would increase the cost of gas, heating, and food for all Oregonians, but it won't make a difference in global climate change. Please protect my community and vote NO on HB 2020.

Sincerely,

Logan Malloy
