

West Coast Electric Highway

Joint Committee on
Transportation

Andrew Dick

Oregon Department of Transportation

February 25, 2019

West Coast Electric Highway

- Network of chargers
- British Columbia to Baja California
- Expands EV charging access and enables distance travel

West Coast Electric Highway

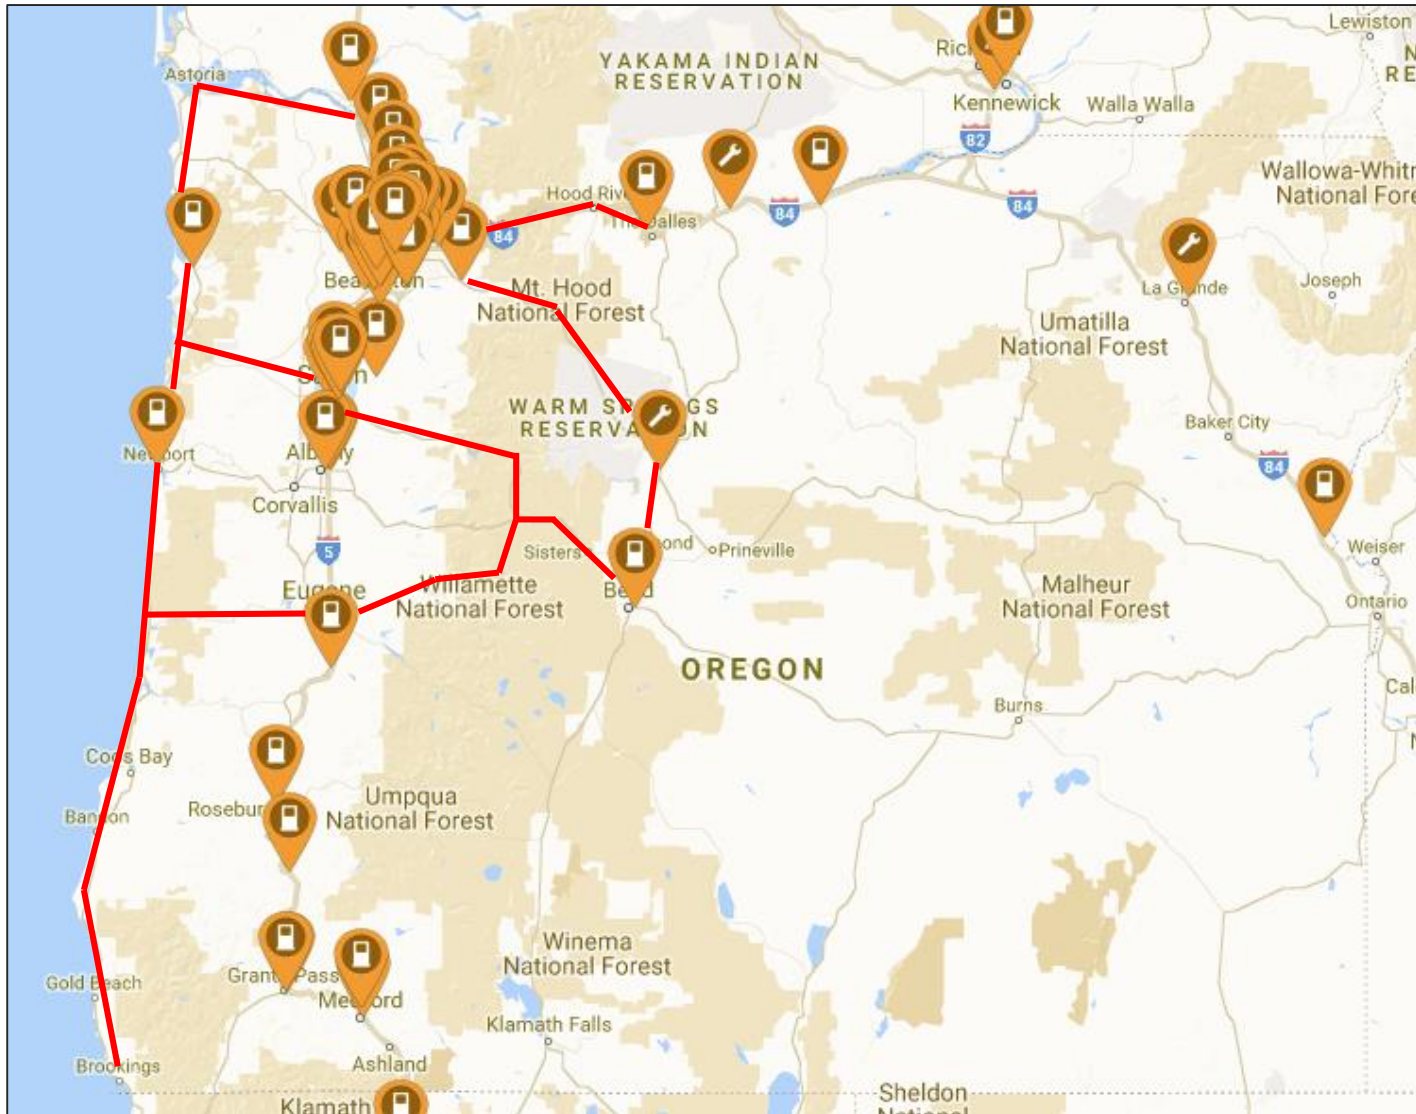

- \$4.5 million in federal grants
- 44 Stations in Oregon
- 3 million miles of all-electric driving
- Over 1,000 MWh of charging

A map of Oregon with 40+ orange gas pump icons indicating gas station locations. The icons are densely clustered in the Willamette Valley, particularly around Portland and Eugene. Other icons are scattered across the state, including in the Klamath region, the Umpqua National Forest, and the Malheur National Forest. Major cities like Portland, Eugene, Corvallis, Bend, and Medford are labeled. National forests such as Mt. Hood, Willamette, Umpqua, and Malheur are also marked. Indian reservations like the Yakama and Warm Springs are shown in the northern and central parts of the state. The map includes major highways like I-5, I-84, and I-90.

Oregon DC Fast Charging Network Without West Coast Electric Highway

■ Gaps in Coverage

Thank you.
