

Hello

My name is Ray Quisenberry. I've lived in Oregon for 28 years and in Salem for most of that time. I've been following this legislation for several years and I'm hoping that this is the year that the Clean Energy Jobs Bill makes it across the finish line. We have a unique opportunity to improve the health of our state and the health of our citizens; all we need is the will and the imagination to create better, cleaner future for ourselves. Please pass this bill. We're running out of time to address the climate crisis.

I've done many things around my home and in my life to reduce my own carbon footprint, thinking primarily of my grandchildren. However, last year when a fire raged through and destroyed the town of Paradise, California, I realized that it's not just my grandchildren that are at risk. That fire destroyed the home of my 89 year old father, who just barely made it out with the help of a brave neighbor. Climate change has become very personal, and my whole family is at risk. Please help me protect them.

Thank you

Ray Quisenberry
