

"Climate Change" (since global warming" didn't work) is a complete *hoax*, based on junk science piled upon junk science. It is a power/control/money grab by government that has zero benefit for either the citizens or the environment of Oregon. <http://www.climate-science-news.com>

If you REALLY want to reduce carbon in the air, why don't you go after the "let-it-burn" that is STILL the official policy of the U.S. Forest Service. Despite all the happy talk, representative/governor fire forums, "let-it-burn" remains on the books, the 1995 "natural ignition" policy. Stupid, idiotic fire policy puts more crap into the air than your programs could ever reduce. And NO – the fires are not being caused by "climate change" which is being used by government to cover its behind for terrible forest management policies. If the Feds refuse to stop our forest fires - how about working on kicking them out of Oregon and reduce their presence in a State as outlined by the Constitution instead of coming after easy-target, cash-cow Oregonians?

You are also using climate change as an excuse to allow dangerous, unhealthy, fire-prone "smart" meters (and soon 5G) to assault our lives and liberty and money.

Your climate change assault upon us is noted. You could be doing so much to help the citizens of Oregon on REAL issues, but you seem hell-bent to just keep assaulting us over and over again with your phony agendas that enrich government and don't do a damn thing for us citizens except hurt us.

How about dropping this climate-change crap and focus instead on homelessness, the P.E.R.s debacle, "let-it-burn," safety-testing microwave exposure that nobody seems to care about, the failing school system, the incomprehensible tax code, and so much more!

DROP THE PHONY CLIMATE CHANGE AGENDA AND GET BACK TO WORK!!!!

Most Sincerely,

Tom Clunie D.C.
