Hello,

I am emailing in support of the concept of this bill. While many /most would adopt a shelter or foster pet regardless of tax consequences there are those for which this would tip the scales in that direction. The deductibility of the costs of adopting an animal is also a tool for getting the word out and emphasizing the beauty of adopting or rescuing animals. Such a bill really would recognize the message our state is sending about managing domestic animals and Oregon's quality of life factor.

From Dog town Bend,
