

Good morning,

I'd like to say that my husband and I are strongly opposed to the Jordon Cove LNG pipeline. This seems to be all about lining a Canadian companies pockets, benefiting them, while taking farmland and tribal land and desecrating the land. It would certainly disrupt precious and beautiful Oregon ecosystems and waterways and potentially allow for environmental disasters of huge impact. With all Oregon's recent wildfires having a pipeline filled with flammable gas going in and through our forests doesn't make any sense at all.

In fact it is so senseless that we wonder who would really benefit by enacting this project?

We also oppose the Clean Energy Jobs Bill at this time because of watering down of the good intentions of the bill by those who have carved out their own way of getting around the restrictions. Please do what is good for Oregon, the people of Oregon! Not the rich or elites.

Thank you,

Lorita Lange and Owen Chamberlin
