

Dear Oregon House of Representatives,

As a Concerned and voting Oregon citizen, Mom, Teacher, First Responder and Health Advocate this is extremely concerning.

At the least, this is an irresponsible, fear-based proposition with little basis in actual reality.

At the most, it is a highly dangerous, fear-based proposition, that will endanger people's health and their medical and personal rights.

There is ample research if one takes the time. Just a few points:

- 1) HERD IMMUNITY, IN IT'S ORIGINAL CONTEXT, REFERS TO ACQUIRED COMMUNITY IMMUNITY, NOT FAKE, TEMPORARY IMMUNITY OF VACCINES.
- 2) THERE ARE REAL AND VALID QUESTIONS AS TO WHAT IS IN VACCINES and IF THE INGREDIENTS ARE HARMFUL TO HUMAN HEALTH.
- 3) THERE HAS BEEN NO TESTING OF SAFETY ON ACCUMULATIVE EFFECTS OF MULTIPLE VACCINES. THEY ARE ONLY TESTED INDIVIDUALLY.
- 4) THE PHARMESEUTICAL INDUSTRY IS UNDER DEEP SCRUTINY AT THIS TIME. IGNORANCE, FEAR AND MONEY SHOULD NOT MOTIVATE LAWS.

Thank you for your deep consideration,

Kathleen LaFleur-Fleming
