Re: HB 3063

Chair Salinas and Members of the House Committee on Health Care:

Please pass HB 3063, which ends non-medical immunization exemptions. We have a measles epidemic currently in our communities that is putting the most vulnerable at grave risk. I have a 4 month old granddaughter that is too young to immunize. She should not be exposed to childhood diseases by those children whose parents simply do not want to vaccinate. Vaccinations save lives and are proven science. Vaccinations should not be a parental choice when not doing so endangers the lives of others in the community. Please pass this bill.
