

With Respect to the Committee;

The Sanctity of Life applies to all of Creation. To continue allowing hunting contests in the great State of Oregon is a betrayal of our collective conservation values. It is a betrayal of common decency.

These coyote killing contests are not sporting in any way, shape, or form nor are they for food. They are a wholesale slaughter, a genocide. To continue to allow such depravity is morally reprehensible.

It is sickening and depraved and must be stopped!
