

Dear to who it may concern- Im a 4 generation native Oregonian and was raised on the Tom McCall ethos of managed growth.

SB- 10 will be a disaster in all respects, instead of rezoning to increase density in inner historic cities- I believe - like they do in London, Paris or San Fransisco- preserving the historic buildings and lower density levels will keep the city livable- after all- if we tear all the old houses down- we will ruin the city and its livability. Also- what about the native plants, animals and trees who will be further displaced by this bill?

Thank tom cramer
