

I I want my voice on the record -that I OPPOSE HB3063. ---

I reject this in the strongest way i can voice my displeasure at this bill this legislation --is discriminatory especially against fragile children that already have a compromised immune system

-furthermore it violates the first amendment rights to freedom of religion -

#2 it violates my right as a parent to have the say in what goes into my child's body --

I have an autistic child and monitoring what is going into his body is of extreme importance and makes all the difference in his mental and emotional well being on a daily basis

-That is MY responsibility as a parent -not your responsibility to tell me what is best for my child

A child missing one dose of the Hep B series will be barred from all public/private preschools and K-12 schools (including online schools) while a child WITH ACTUAL HEP B would be allowed to attend school. Make sense? This bill is like trying to remove tonsils with a hatchet instead of a scalpel. Our current exemption and exclusion process is WORKING. There should be a clear, direct, immediate danger before removing a child's right to an education. Without an actual threat, this is nothing but discrimination and violates my rights as a parent

I I want my voice on the record -that I OPPOSE HB3063. --

t Oregon's unvaccinated rate is only 2.6%.

I I want my voice on the record -that I OPPOSE HB3063. --
