Action Items

- I do not feel the Legislature understand the full scope of need for this population of Developmentally Delayed. This population can not take care of themselves and it takes an army of care providers to meet all the persons needs.
- If I did not have Providers to help me with my child, I would not be able to work (and pay taxes to support all of Oregons programs). I would need mental health support myself anomy family would be fractured. You have no ideas of the intensity of the family dynamics. Please do not make laws you do not understand the impact of.
- Providers are caring for the Client as wells the primary caregiver by giving respite and hope.
- Please do not make changes you donate understand the implications of. Reach out to the families so we have a chance to give Legislature a clearer picture of what life is like caring for a Developmentally Delayed person. It is all consuming and the Providers give valuable respite and community for the Client.

Concerns

We are urging the subcommittee members to draft an amendment ADDING Pop 126 to HB 5026.
