

Hello, I am a nurse,a mother and a grandmother. About 4 years ago my son's five year old daughter was not current on her immunizations as her mother did not believe in them and ran a daycare in Bend, Oregon with about 12 to 15 kids. My son did not have custody at the time and his daughter was sick and he took her to the doctor and they asked why she was not current on her immunizations. My son said the mother did not believe in taking a child to a doctor regularly and did not believe in immunizations. My son did get her immunized then as she was getting ready for kindergarten. Last year my son finally won custody of the child. A person should not be able to run a daycare and not have her own children immunized .Her 3 year old from another father was not immunized.
