

To the Legislature:

Good morning. I am writing to express my whole hearted opposition to House Bill 3063 which has the potential to deprive thousands of Oregon children from access to an education.

It is my belief that this discriminatory discussion is the opposite of our held American values of freedom and liberty.

Medical decisions should be left up to the family and their directly informed doctor, not the government. Individualized care is what makes our country thrive.

Oregon families will continue to fight for our medical freedom.

Thank you for your time.

Taylor Mikels
