

To Whom It May Concern

I am writing this email to voice my opinion about the HB 2020 that is being proposed. I am very concerned about the effects of this bill. I think that this needs to be researched and thought about a lot more than it has. I have read several studies and I do not feel that this is the appropriate way to address the climate issues. I am concerned about how it will affect our middle to low income families and our economy.

Hear the peoples voice, please do not approve HB 2020.

Thank you
