

To Whom It May Concern:

I urge you to vote down HB3063. Medical freedom is important for my family. We have chosen to forgo vaccines made with aborted fetal stem cells as a matter of conscience. Please do not force us to inject ethically dubious vaccines into our children! I am not anti-vaccine, I am pro-safe and pro-ethical vaccine. We will definitely be pulling our children out of the public school system if this bill passes. Both my husband and I work in public education so this will be very hard for us.

Sincerely,

Jennifer Snoozy
