

Honorable Legislators,

I am writing to share my concerns with you regarding the dangerous bill, HB 3063, which you will be voting on tomorrow, or in the near future. I strongly urge you to reject this intrusive bill.

With the recent measles outbreak, mass hysteria surrounding the issue of herd immunity and forced vaccination has ensued. As a grandparent of a grandchild with autism, most likely received after vaccinations at birth, I have read extensively on this issue, and hope that you have all read on both sides of this also. Great numbers of medical experts have denounced the "herd immunity" theory. And great numbers of innocent children have been irreparably harmed by vaccinations, resulting in over 6 BILLION dollars paid out through the VAERS program. Every parent should have the right to assess the benefits and risks of vaccinations and act accordingly.

To force families to vaccinate their children is allowing a Gestapo state to control our health care in unprecedented and undesirable ways. I urge all of you to vote NO on HB 3063. Thank you for your time.

Sincerely,
Sandra Dau
Oregon City, OR
