

To Whom It May Concern,

I am a current resident of Portland, Oregon, and due to weather I am very unfortunately unable to attend the Public Hearing for Bill HB3063 tomorrow. I strongly oppose this Bill. I believe it is our right as Americans to have medical freedom to make the choices we feel are best for ourselves and our children. I personally believe that with a stronger component of education in the doctor's and/or Pediatric offices, more people will choose to vaccinate willingly instead of being forced to reluctantly. Please take this into consideration. Thank you.
