Date: Wednesday, February 27, 2019 8:57:00 PM

Dear Committee Members,

I want to start by saying I am not anti-vaxx. The safety of my own children, children who are vaccinated and those who are not, are of utmost importance to me. All I am requesting is sufficient testing take place prior to mandating vaccines in order for children to attend school. This law involves mandates on me as a parent to have my child injected with dangerous neurotoxins (aluminum, formaldehyde and mercury) that have NEVER had any blind placebo testing done in order to receive a public education. This is taking away my rights as a parent and rights for my child to receive an education. Is it too much to request that the manufacturers be held accountable for their products? Why can't testing be done by a third party? Is it unreasonable to ask for safety and testing?

My hope is that you as representatives in my state will do everything in your power to fight for me, my family and all families to ensure they are protected from harmful vaccines that have NEVER been sufficiently tested. Please don't make Oregon children a test subject because legislative members are not holding vaccine makers accountable to do their due diligence in requiring them to complete ethical third party placebo testing.

Thank you for your time,
A Pro-Safer Vaccination Mother (Valerie Van Hess)
